**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Androlia on February 22, 2008.

2. The application has been amended as follows:

In claim 11, line 3, insert --a-- before "conical".

In claim 14, line 3, insert --or a-- before "photo diode array".

In claim 23, line 8, replace "a first X-ray tomography is executed" with

--said X-ray computer tomography apparatus is configured to execute a first X-ray tomography--.

In claim 23, line 9, replace "a second X-ray tomography is executed" with

--configured to execute a second X-ray tomography--.

In claim 23, line 11, insert --further-- before "comprising".

In claim 23, line 14, insert --configured-- before "to control said object moving means".

In claim 23, line 16, in the phrase "rotary radiation means", delete "rotary".

In claim 23, line 16, insert --configured-- before "to execute said first".

In claim 23, line 17, in the phrase "rotary radiation means", delete "rotary".

In claim 23, line 18, replace "rotary" with --radiation means--.

3. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: (in figure 1, at reference numeral #54, replacing “motor” with --motor--), (in figure 14, at reference numeral #54, replacing “motor” with --motor--), and (in figure 15, at reference numeral #55; replacing “motor” with --motor--).

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

#### *Reasons for Allowance*

4. Claims 3-23 are allowed. The following is an examiner’s statement of reasons for allowance.

Regarding claim 23, the prior art fails to disclose or fairly suggest an X-ray computer tomography apparatus, including a processing means configured to control said object moving means to move said object holding means depending on the changing of rotary angle of said X-ray radiation means, and configured to execute said first X-ray tomography, while said X-ray radiation means rotates around said object during execution of said first X-ray tomography, with a center of said X-ray radiation means being fixed relative to said apparatus, in combination with all of the other limitations in the claim. Claims 3-22 are allowed by virtue of their dependency.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
